CERTIFIED INFORMATION SECURITY MANAGER REVIEW CLASS

March 24 - May 19, 2012
ISACA Manila Professional
Development Center, Makati City

The Certified Information Security Manager (CISM) certification is a unique management-focused certification that has been earned by more than 16,000 professionals since its introduction in 2003. Unlike other security certifications, CISM is for the individual who manages, designs, oversees and assesses an enterprise's information security.

Strong security management is crucial in any enterprise using IT to support its business needs. Today's IT environment calls for systems that are secured not only from external, malicious attacks, but from unauthorized internal change as well. The Certified Information Security Manager® (CISM®) certification program supports these business needs. The program is developed specifically for experienced information security managers and those who have information security management responsibilities.

With the CISM designation comes many professional and personal benefits including:

- Worldwide recognition for professional experience
- Enhanced knowledge and skills
- Career advancement

Who Earns CISM Certification?

The CISM certification program is developed specifically for experienced information security managers and those who have information security management responsibilities.

CISM certification is for individuals who design, build and manage enterprise information security and who have experience in the following areas:

- Information Security Governance
- Information Risk Management
- Information Security Program Development
- Information Security Program Management
- Incident Management and Response

Why CISM?

CISM demonstrates proven experience: The demand for skilled information security management professionals is on the rise. Earning a CISM designation will give you a competitive advantage. Many enterprises and government agencies increasingly recognize, require and expect their IS and IT professionals to hold this certification. Being a CISM:

- Demonstrates your understanding of the relationship between an information security program and broader business goals and objectives
- Distinguishes you as having not only information security expertise, but also knowledge and experience in the development and management of an information security program
- Puts you in an elite peer network

CISM enhances credibility and recognition: CISM is globally recognized as the leading credential for information security managers. CISM combines the achievement of passing a comprehensive exam with recognition of work, management and educational experience, providing you with greater credibility in the marketplace.

CISM means higher earning potential and career advancement: Recent independent studies consistently rank CISM as one of the top two highest paying and sought after IT certifications.

CISA and CISM Approved

The American National Standards Institute (ANSI) has accredited the CISA certification under ISO/IEC 17024:2003, General Requirements for Bodies Operating Certification Systems of Persons. ANSI, a private, non-profit organization, accredits other organizations to serve as third-party product, system and personnel certifiers. ISACA is proud to be recognized with this international standard of performance.

2012 CISM Job Practice Areas

The CISM exam is offered each year and consists of 200 multiple-choice questions that cover the five information security management job practice domains created from the most recent CISM job practice analysis. The percentages below indicate the emphasis of questions that will appear on the exam from each domain. The job practice analysis was developed and validated using prominent industry leaders, subject matter experts and industry practitioners.

The domains and their definitions are as follows:

Domain 1—Information Security Governance (24%)

Establish and maintain an information security governance framework and supporting processes to ensure that the information security strategy is aligned with organizational goals and objectives, information risk is managed appropriately and program resources are managed responsibly.

Domain 2—Information Risk Management and Compliance (33%)

Manage information risk to an acceptable level to meet the business and compliance requirements of the organization.

Domain 3—Information Security Program Development and Management (25%)

Establish and manage the information security program in alignment with the information security strategy.

Domain 4—Information Security Incident Management (18%)

Plan, establish and manage the capability to detect, investigate, respond to and recover from information security incidents to minimize business impact.

CISM exam questions are developed and maintained carefully to ensure that they accurately test an individual's proficiency in information security management. For a description of task and knowledge statements for each area, please refer to www.isaca.org/cismjobpractice.

CISM REVIEW COURSE

The ISACA Manila Chapter can help you become a CISM. We are conducting a series of review classes that will help you prepare for this year's CISM examination that is scheduled on June 9, 2012. REFERENCE MATERIALS

Passing the CISM exam can be achieved through an organized plan of study. To assist individuals with the development of a successful study plan, ISACA offers study aids and review courses to exam candidates (see www.isaca.org/CISMbooks for more details). order early: The delivery time can be one to two weeks, depending on geographic location and customs clearance practices. For current shipping information, see www.isaca.org/shipping.

1. **CISM® online review Course** is an interactive, web-based course that provides CISM exam candidates and ISACA members throughout the world with a consistent, efficient and cost-effective tool for exam preparation. The course includes interactive exercises, case studies, review tools and practice questions. Visit www.isaca.org/elearning.
2. **Candidate's Guide to the CISM Exam and Certification** is supplied to individuals upon receipt of the CISM exam registration form and payment. This guide provides a detailed outline (task and knowledge statements) of the five content areas covered on the exam. It also contains exam administration information, examples of question types, certification and maintenance requirements, and a sample copy of an admission ticket and exam answer sheet.
3. **CISM Review Manual 2012** features an easy-to-use format and has been updated to reflect a new job practice analysis. Each of the five chapters has been divided into two sections for focused study. section one of each chapter contains the definitions and objectives for the five areas, as well as the corresponding tasks performed by Is auditors and knowledge statements (required to plan, manage and perform Is audits) that are tested on the exam. **Member—US\$105, NMember— US\$135**
4. **CISM® Review Questions, Answers & Explanations Manual 2012** consists of 900 multiple-choice study questions that have previously appeared in the CISM® Review Questions, Answers & Explanations Manual 2010 and the 2010 Supplement. Many questions have been revised or completely rewritten to recognize changes based on the new 2012 CISM job practice, to be more representative of the current CISM exam question format, and/or to provide further clarity or explanation of the correct answer. **Member—US\$100, NMember— US\$130**
5. **CISM® Review Questions, Answers & Explanations Manual 2012 Supplement** features 100 new sample questions, answers and explanations to help candidates effectively prepare for the 2012 CISM exam. These new questions reflect the 2012 CISM job practice areas and are designed to be similar to actual exam items. **Member—US\$40, NMember— US\$60**
6. **CISM® Practice Question Database** combines the CISM Review Questions, Answers & Explanations Manual 2012 with the CISM Review Questions, Answers & Explanations Manual 2012 Supplement into one comprehensive 1,000-question pool of items. **Member—US\$185, NMember— US\$225**
